

IHQC's Project Management Learning Labs build the skills needed to manage large and small-scale quality and practice transformation initiatives. In a shifting healthcare environment that includes payment reform initiatives, diverse grant opportunities, and cross-sector partnerships, these project management skills can help put your organizations in a better position to navigate the changes that lie ahead.

These learning labs are ideal for team members at all project management skill levels and degree of project involvement, whether they're the project lead or supporting specific components.

Space is limited, so [register today!](#)

Create and Maintain Project Plan

- Developing and Maintaining Project Management Plans (A3's, Work Plans & Charters, Project Dashboards)

Build & Foster an Effective Team

- Defining team responsibilities using RACI grids
